

Aqua Chi Ionic Foot bath

Understanding What It Is, How It Works and Its Importance

Vast clinical studies on the bio-electrical effects the Aqua Chi Ionic Foot bath Detox has on the human body have been performed and thousands of Aqua Chi's Ionic Foot-baths are found in Medical Facilities worldwide. Trinity Holistic Wellness, being one of the frontiers in natural medicine in the greater Indianapolis area, is pleased to offer this innovative technology to our patients and clients.

When understanding the detoxifying effects the Aqua Chi has on the body, you'll need to look at the body for what it is. The human body is a complex bio-electric living organism, in which it maintains a homeostasis that fine tunes itself in its own bio electromagnetic field.

Try looking at the human body as a battery. When you look at it this way it's easier to see the fluctuating levels of energy that take place on a daily basis in the body.

By use of water as a medium, the Aqua Chi creates a higher charge other than the one that surrounds the cell walls. The greater electrical charge of the charger flows to the lesser charge of the cells until the charge is balanced, making the proper conditions all that's needed to make this occur.

Because Aqua Chi creates a higher charge other than the one that's around the cell walls, the cells will automatically take the higher charge. Although the charge in the cells may be low this will occur automatically.

Keep in mind that the Aqua Chi creates the same charge in the water that the cells have in the body. The body will automatically regulate the charge that the cells can take. Therefore, the absorption rate is always in balance with the body, being that it is determined by the body. If the charge is lower in the body, the body will take the higher charge that's in the water. Any unhealthy or damaged cells will take a lesser charge. However, over time the cells will strengthen their absorption and function as a healthy or undamaged cell. The healthier the cells are the better they can accept the charge and the better they can repair themselves.

Cells degenerate over time and need to be continually refreshed. Charging healthy cells will keep them in good health. By use of healing electromagnetic frequencies, which re balances and amplifies the bodies own bio-electric field, one can maintain a healthy body.

Water Discoloration

The discoloration in the water is caused by an excess electronic charge working on certain impurities in the water and in the body. Different types of water such as tap water for example, will manifest different degrees of discoloration. It is completely normal and does not harm nor does it enter the body.

The human body is composed of billions of cells. Each one of those cells has a job to do as part of your well being. The Aqua Chi allows us to restore and maintain a healthy charge around the wall of each cell. It does this by converting the AC current from the building into DC current. This DC current creates a charge in the water that is compatible with the charge around our cells. Every person has a different charge bio-electrical pattern. The frequency in the water becomes tailor made to the user.

As the cells accept the water's enhancing change, there becomes a remarkable difference with the separation of blood cells which tend to travel in clumps when they're in an unhealthy state. With the entire surface exposed they work far more efficiently within our arteries and veins. Anyway you look at it, it's an amazing process.

While, any part of the body can be submerged when using the Aqua Chi, choose to submerge the feet because due to the easy access and comfort. We also like to invite our clients to enjoy a complimentary Hemi-Sync meditation session during their Aqua Chi foot-bath in an attempt to enhance the healing experience.
